

CPC - Highways Working Group – Update May 2023

The unfortunate accident on the Orwell Bridge and its closure on Tuesday 9th May just confirms the inability of the B1078 to cope with increased traffic flow and in particular large HGVs.

Our Working Group considered it beneficial to all future discussions with SCC Highways on the B1078 and Church Road in the village to be based on accurate and current data.

Since our last meeting we have heard from Andrew Bramwell, SCC Senior Strategic Transport Planner. He has received confirmation that all five survey locations within Coddendam, will be monitored from 15th of June 2023 for two consecutive weeks to collect current vehicle data.

The full cost of the surveys will be covered by SCC.

We need a further update from:-

Matthew Hicks, on what is the progress of Transport linking with Trading Standards.

Tim Passmore, on the progress of an ANPR camera in Coddendam.
